PERSONAL OBJECTIVE

Dedicated software engineer seeking to work collaboratively and continue in lifelong learning

PROFESSIONAL EXPERIENCE

Production Support Engineer | RxSense | Boston, MA (Remote) Aug 2022 - Present

- Supported RxAgile application, providing expertise focused on data side application support
- Collaborated with cross-functional teams to diagnose, prioritize, and resolve production issues, utilizing Jira-based ticketing system for tracking, reporting and documentation
- Implemented new code and updated existing code in the production environment and other lower environments such as implementation and quality assurance
- Utilized SQL Server Management Studio to investigate and resolve data issues in the RxAgile application, working with both front-end and backend components
- Engaged in weekly agile meetings with discussion of task queue, progress, and planning
- Gained exposure to enterprise level C# backend codebase, systems, and configurations

Software Developer Intern | Trainer! App LTD | Remote Oct 2021 – March 2022

- Worked collaboratively with a team of developers to create a mobile app for Android, utilizing a variety of technologies including Java, Node.js, Express, and MongoDB
- Acted as a valuable support role by identifying and correcting errors, assisting with simple design tasks, and proofreading code to ensure quality and accuracy
- Regularly participated in weekly scrum meetings and requirement discussions

EDUCATION AND CERTIFICATION

Bachelor of Science in Computer Science | Aurora University, Aurora, IL Graduated May 2022

- GPA 3.9/4.0 – Magna Cum Laude
- Coursework: Software Engineering, Data Structures and Algorithms, Software Analysis and Design, Web Application Development, Object Oriented Programming, Database Design and Implementation, Capstone, Computer Architecture, Photography, Social Work

AWS Certified Cloud Practitioner | Amazon Web Services Jan 2023 – Jan 2026

- Demonstrated cloud fluency and foundational AWS knowledge through AWS certification

Study Abroad | International College of Sevilla, Sevilla, Spain Sep 2018 – Dec 2018

PROJECTS

Data-fy | Java, Spring Boot, React, REST API 2023

- Independently developed web-based Spotify API app using React, Java, Spring Boot, Maven, and REST API, creating an engaging and user friendly experience
- Designed, programmed, and tested the application from start to finish, demonstrating deep understanding of React and Java, as well as utilizing external APIs

Incident Management System | React, Node.js, REST API, SQL 2021-2022

- Developed a web-based incident management system for a local business using React, Node.js, SQL, and REST API with a team of four people in an agile environment
- Led creation of key project documentation, ensuring clear communication and alignment with stakeholder needs
- Designed and built a user-friendly frontend from scratch, while also contributing to the development and design of the backend and database

SKILLS

Programming: Proficient in Java, React, C#, Spring Boot, Maven, SQL, JavaScript, REST API, Git
Tools: Proficient in SSMS, Jira, Confluence, Slack, MySQL, IntelliJ, Rider, Visual Studio, GitHub, BitBucket, Microsoft Office(Word, Excel, and PowerPoint)
Working knowledge of AWS, MongoDB, XAMPP, Adobe Photoshop, Illustrator
